Table 1. Number of Students under Age 13 by Age Participating in Social Networking Services

Age	Not Participating	Participating	% Participating
8	13	0	0
9	33	7	18
10	44	30	41
11	28	35	56
12	1	9	89
Totals (N = 199)	119	80	

Table 2. Students under Age 13 by Gender Participating in Social Networking Services

Gender	Total	Participating	%
Female	107	51	48.6
Male	79	36	45.6

Table 2 Descriptive statistics for anxiety and sibling relationship quality by sibling diagnosis

Variable	Type of disability						t
	ASD			DS			
	M	SD	n	M	SD	n	
Anxiety	53.24	14.10	78	49.91	15.80	37	2.38 <sup>a</sup>
Sibling relationship quality							
Social support	54.26	14.76	81	68.74	13.85	38	5.08 <sup>* b</sup>
Negative interchanges	16.12	6.96	77	10.92	4.69	38	4.73 <sup>* c</sup>
Overall rel. quality	81.83	18.54	77	100.77	16.56	38	4.81 <sup>* d</sup>

<sup>a</sup> df for t test on anxiety was 105; <sup>b</sup> df for t test on social support was 109; <sup>c</sup> df for t test on negative interchanges was 105; <sup>d</sup> df for t test on overall relationship quality was 105

\* p < .0001 (two-tailed)
